ELAAF SCHOOL SYSTEM

Elaaf School System provides quality Education through English medium to the children. The School is managed by Divine Child School, adjoining Assembly hall, Underground laboratory, airy classes and is blessed by Outstanding teachers .

The school provides each student an exciting and rigorous educational experience designed to help each of them to grow to become a caring, thoughtful, principled, personally and socially well balanced human being. Each child will have opportunities to become technologically literate, learn to communicate effectively, build teams and take risks in life in supportive environment.

VISION
COMMITTED
TO A
BETTER
TOMORROW

We have created this website at school on which we are using Html, first we have created a header which contains 5 pages.

After that we first created an image slider using bootstrap and then we create about us section, in this section we talked about our school and Some more details have been given. After that we created the events section, In this section we have given 4 containers and linked each containers to a separate page Where we have given the option of images, on clicking on the container button, the images from the event will be opened on a separate page. After that we have created a video gallery on which we have also used JavaScript. The first video is playing and the rest of the videos will start again when we click on them with the help of JavaScript.

After that we have developed a contact option On which we have given the location of the school on one side and a form on the other side and finally the submit button.

At the end of the website We have drawn a footer on which we have written the vision of the school and given the WhatsApp number and last we made two buttons 1. Facebook 2. Instagram Which we have linked from our school website and to make all these works beautiful we have used Css.

Html, css and Java script We used all three on this website.

OBJECTIVE:

To enable equal opportunities for diverse learners to meet their academic, social, emotional and physical needs through a broad, balanced academic and social curriculum. We offer intensive, research-based, targeted interventions – typically in the core areas of literacy and numeracy – and also help with study skills and organization, as well as behavioral/emotional support. Students are included in all aspects of school life to ensure that all are given the opportunity to contribute to the academic, social and cultural activities of the school.

Education System:

Students engage in self-learning activities, in groups or under supervision as you will note in the exhibit, and are provided multiple resources they can choose from. Students might be assigned to research, read, write a story, plan a project to build robots, Skype to conference or collaborate, use a model, or play a game to relax.

Art and creativity:

We encourage our students to think outside the box. Creativity is a valuable skill that can be applied across subjects and in various aspects of life. Nurturing creativity from a young age helps students become innovative thinkers.

Sports and Games:

Through Sports, we encourage our students to grow and develop both as people and players. We organize incorporated different games such as sack race, three-legged race, gymnastics, and tug of war which gave students the chance to showcase their team spirit, self-discipline, teamwork, and sportsmanship.

REVIEW:

THANK YOU BANO QABIL AND MISS SUMBUL SALEEM...Your training session was excellent! Your energy and enthusiasm were infectious, and you kept us engaged throughout the entire class. I appreciated how you provided practical tips and insights that we could immediately apply to our work. Thank you for your dedication to making this course a success. Your hard work and dedication are greatly appreciated by all of us. ❤️
